Mooner Token

Mooners Team, March 2018

DISCLAIMER

Not an investment offer
This document is not an offer of securities or a collective investment scheme, nor does it require registration with or approval from the Monetary Authorities. Contributors are advised to read this document carefully in full, and perform due diligence.

This document is for informational purposes only and does not constitute an offer or solicitation to sell shares or securities in Mooner Token or any related or associated company. Any such offer or solicitation will be made only by means of a confidential offering memorandum and in accordance with the terms of all applicable securities and other laws.

No ownership rights
Mooner tokens shall not grant any right or influence over Mooners organization. Mooner gives no direct or indirect right to Mooners's capital or income, nor do they bestow any governance right within Mooner. An Mooner token is not proof of ownership or a right of control. It does not grant the controlling individual any asset or share in Mooners as an organization, or in the Mooners network. A Mooner token does not grant any right to participate in control over Mooners's management or decision-making, or over the Mooners network and governance, either to Purchasers, or to those who obtain xMNR tokens from the airdrop.

No Tax or Legal Advice
Mooners does not provide legal or tax advice, and the information herein is considered general and educational in nature. Tax laws and regulations are complex and subject to change, which can materially impact investment results. Mooners cannot guarantee that the information herein is accurate, complete, or timely. Mooners makes no warranties with regard to such information or results obtained by its use, and disclaim any liability arising out of your use of, or any tax position taken in reliance on, such information. Consult an attorney or tax professional regarding your specific situation.

Token Holder Responsibilities
Parties who choose to obtain the Mooner token will take the time to understand cryptocurrencies, blockchain systems and the risks associated with cryptocurrencies.

Use of Ethereum Blockchain
Mooner is based on the Ethereum Protocol. Hence, any operational error of Ethereum protocol will cause Mooner's network to have malfunctions.

Third-Party Websites
Links to third-party websites and applications are provided for your convenience and informational purposes only. Mooners is not responsible for the information contained on, nor the security of, third-party websites or applications.

ABSTRACT

Mooners is a market analytics platform built for the masses, we aim to use machine learning to find market patterns and advise investors about possible Market opportunities and market analyses with an easy to use platform. In addition to our ERC20 compliant xMNR token, which is being mass distributed for free, we'll provide, security tips, and other services to make trading and using cryptocurrencies profitable for everyone.

1. INTRODUCTION

If you are new to cryptocurrency and want to invest, but are afraid of the unpredictable behavior of the cryptocurrency market, you're in the right place. Mooners is here to make the hard work for you and help you with investment tips and analyses.

1.1   USER TYPES

There are 2 types of users:

1. **Crypto investors** who are looking for investment opportunities and market advices.

2. **Experienced Crypto users** who are interested in helping us out with market tips, training our machine learning computer and validating market moves.

2. USAGE

Each type of user will interact with the token in two different ways:

1. **Regular Investors** are going to exchange their tokens for market tips and market analyses data.

2. **Experienced investors** are going to earn tokens by helping the community with valid tips.

3. BASIC TERMINOLOGY

Cryptocurrenty is a digital or virtual currency that is secured using cryptography. You've probably heard of **Bitcoin (BTC)**, which was the first successful decentralized cryptocurrency. This means it functions without a central computer or bank. Instead, Bitcoin and other cryptocurrencies rely on a public ledger system called the **blockchain** which exists on multiple **nodes** (computers with copies of the blockchain). Peer-to-peer transactions are carried out by **miners**, which compute the correct values to satisfy the hash function in the blockchain. The blockchain is made up of a linear sequence of **blocks**, or files that permanently record cryptocurrency transaction data.

Ethereum is a blockchain featuring **smart contracts** which are programs which enforce a contractual relationship with cryptographic code. This means that contracts between parties are carried out exactly as programmed. **Ether (ETH)** is the currency designed as "fuel" for the Ethereum blockchain. However, the standards such as **ERC20** also allow anyone to develop a **token** which can operate on the Ethereum blockchain. Mooner (xMNR) is one example of an ERC20 compliant token.

4. MOONER (xMNR) TOKEN
A fixed supply of 40,000,000 (40 milion or 10^8) ERC20 compilant Mooner tokens (xMNR) will be created.

Specifications
- **Name:** Mooner
- **Symbol:** xMNR
- **Standard:** ERC20
- **Platform:** Ethereum
- **Supply:** 40,000,000 (10^8)
- **Decimals:** 8
- **Contract Address:** 0x9ab0846fd44f467f7496bc2aa13eab5203c72a50

3. CONCLUSION

The Mooner token and Mooners website will help onboard new cryptocurrency users and help people curious about cryptocurrencies how and when to obtain cryptocurrencies themselves. In addition, the xMNR token can be adopted by developers for the use in their own projects.
